Pennsylvania Health Care Cost Containment Council

225 Market Street, Suite 400, Harrisburg, PA 17101

Phone (717) 232-6787, Fax (717) 232-3821, Web <http://www.phc4.org>

Council Members

Chair—Daniel Tunnell (Pennsylvania Gas Association - Business)

Vice Chair—Jack Steinberg (Philadelphia Federation of Teachers - Labor)

Treasurer—William Lehr, Jr. (Hershey Foods, Inc. / Retired - Business)

Patricia W. Barnes (Quantel Associates - Labor)

Leonard A. Boreski (Pennsylvania Chamber of Business and Industry - Business)

Darrell L. DeMoss (Cigna Property and Casualty - Commercial Insurers)

Randall N. DiPalio (Local 520 Plumbers and Pipefitters Union - Labor)

Richard Dreyfuss (Hershey Foods Corporation - Business)

Thomas F. Duzak (Steelworkers Health and Welfare Fund - Labor)

James R. Godfrey (Healthguard - Managed Care)

Daniel Hoffmann (Secretary of Health - Administration)

Feather Houstoun (Secretary of Public Welfare - Administration)

Janet Kail (AFSCME Council 13 - Labor)

M. Diane Koken (Insurance Commissioner - Administration)

Mary Ellen McMillen (Independence Blue Cross - Blue Cross/Blue Shield)

Richard A. Reif (Doylestown Hospital - Hospitals)

Richard M. Ross, Jr. (Business)

Carl A. Sirio, MD (Physicians)

Karen White (PACE - Consumers)

David Wilderman (AFL-CIO - Labor)

Clifford L. Jones—Executive Director

Acknowledgments

The Council would like to thank the following Technical Advisory Group members for their dedicated assistance in creating this report.

Chair—David B. Nash, M.D., M.B.A., Thomas Jefferson University Hospital

J. Marvin Bentley, Ph.D., Penn State University

David B. Campbell, M.D., Penn State Geisinger Health System—Cardiac Surgeon Advisor

Paul N. Casale, M.D., The Heart Group—Cardiologist Advisor

Donald E. Fetterolf, M.D., M.B.A., Keystone Health Plan West

James Grana, Ph.D., US Quality Algorithms/AETNA US Healthcare

George Green, M.D., Abington Medical Specialists

Sheryl F. Kelsey, Ph.D., University of Pittsburgh

Judith R. Lave, Ph.D., University of Pittsburgh

The Council would also like to thank the Joint Committee of the Hospital Association of Pennsylvania, the Pennsylvania Medical Society, and the Pennsylvania Osteopathic Medical Association for their selfless assistance and support throughout this process. Finally, we want to acknowledge the many hospital staff, physicians, and payers who checked and rechecked their data. Without their efforts, this report would not have been possible.

Foreword

The Pennsylvania Health Care Cost Containment Council has prepared its fifth *Guide to Coronary Artery Bypass Graft Surgery*. The report provides information on patients treated for CABG surgery in Pennsylvania hospitals in 1994 and 1995. The *Guide* builds upon past Council CABG reports by including, for the first time, information about CABG patients belonging to specific health plans and programs.

Pennsylvania's health care system is changing dramatically. With the growth of managed care and the emergence of highly organized health systems, it is increasingly important to examine the interrelationships of hospitals, physicians and payors. The first report of its kind to include hospital, physician and specific health plan information in one report, *Pennsylvania's Guide to Coronary Artery Bypass Graft Surgery* sets the stage for more comprehensive public reporting of health plan data in future reports.

It is important to note that the data reflected in this report covers the period 1994-1995, therefore it has limitations. The health care delivery system has changed dramatically since that time and the same categories today may show different results. Additionally, although a high volume, high cost procedure, CABG surgery generally represents a small portion of the overall health care utilization of health insurance plan enrollees. Therefore, the data in this report should not be the only factor in any health care decision, particularly with regard to choosing a health plan. It is, however, a start in helping the public examine the changing nature of our health care delivery system.

Several supplementary documents have been prepared pertaining to the *Guide*. Most of the data contained in the *Guide* have been displayed in a series of graphs. This *Technical Appendix* provides the actual numbers, in tables, that form the foundation for the graphs. The *Appendix* also contains a list of the significant risk factors used to adjust the mortality and length of stay statistics. Finally, it contains the length of stay data according to each cardiac surgeon.

Other publications related to this project include: *Health Plan, Hospital and Physician Comments*, as well as *Research Methods and Results*. These free documents are available to the public upon request and can be obtained by contacting the Council.

Risk Factors

Listed below are risk factors to in-hospital mortality in the *Pennsylvania's Guide to Coronary Artery Bypass Graft Surgery, 1994-1995*:

- as severity increases (*being an ordered categorical variable, the coefficients are as expected; that is, the higher levels are associated with an increased risk of in-hospital mortality*);
- as age increases (from approximately age 45 and up);
- for patients with pre-operative cardiogenic shock;
- for patients who underwent PTCA during the same admission as CABG;
- for patients with complicated hypertension;
- for patients undergoing dialysis;
- for females;
- for patients with heart failure; and
- for patients who had prior CABG and/or valve surgery.

Note: Detailed information on risk factors is available in the *Research Methods and Results* report.

Listed below are risk factors to in-hospital (post-surgical) length of stay in the *Pennsylvania's Guide to Coronary Artery Bypass Graft Surgery, 1994-1995*:
