

# Medicare Payment (2012 Data)

## Table Notes

Number of Cases displays the number of cases included in the Average Medicare Payment.

Average Medicare Payment includes payments made to hospitals for Medicare fee-for-service patients (PA residents) who underwent knee/hip replacement and were discharged between January 1, 2012 and December 31, 2012—the most recent Medicare payment data available. This time period differs from that of the hospital readmission information reported where a different set of data was available. The Medicare payment data was obtained from the Centers for Medicare and Medicaid Services. Payments from Medicare Advantage plans (e.g., Medicare HMOs) are not included.

Average Hospital Charge for the Medicare fee-for-service patients is for the entire length of stay and was trimmed and case-mix adjusted. In almost all cases, hospitals typically receive actual payments from private insurers or government payers that are considerably less than the listed charge.

Hospital	Number of Cases	Average Medicare Payment	Average Hospital Charge
<b>Statewide</b>			
Knee	8,503	\$12,286	\$51,535
Hip	3,594	\$11,822	\$53,598
