

Surgeon Volume

Table Notes

Surgeon volume includes all adult total knee and hip replacements, elective and non-elective.

Not included in this measure are procedures performed on patients less than 18 years old, those performed in Veterans' hospitals, or those performed in other states by surgeons who also practice outside Pennsylvania.

If two joint replacements were performed during the same hospitalization, the case was only counted once. However, if two joint replacements were performed during the same hospitalization and two different surgeons performed the surgeries, an exception was made when counting surgeon volume and each replacement was counted once for each surgeon.
